

Anti-STREPTOKINASE

(Polyclonal sheep)

Cat. No.:	CA-1012a.
Immunogen:	Highly purified streptokinase from <i>Streptococcus haemolyticus</i> .
Cross-reactions:	Reacts only with intact pure streptokinase and with no other proteins so far tested. Reacts with plasminogen-streptokinase complexes.
Titre:	High titre but depends on the assay system. 1:5000 by inhibition of streptokinase activity.
Presentation:	Untreated pooled serum.
Applications:	ELISA, Western blots, and immunoinhibition
Storage:	+4 °C. For extended storage, freeze in working aliquots at -20 °C. AVOID repeated freezing and thawing. Add azide if appropriate when storing at +4 °C.
